LEGACY

**EMPOWERED BY THE PEOPLE.
GOVERNED BY THE COMMUNITY. BUILT FOR THE FUTURE.**

OFFICIAL WHITEPAPER

VERSION 1.0 | YEAR 2026

LEGAL DISCLAIMER

AND RISK DISCLOSURE

This Whitepaper is provided for informational purposes only and does not constitute investment, legal, financial, or tax advice, nor an offer to buy or sell any digital asset.

Participation in the MEWARX LEGACY ecosystem involves risks, including market volatility, regulatory changes, technological failures, cybersecurity threats, and potential loss of value. Users should conduct their own research and seek independent professional advice before making any decisions.

EXECUTIVE SUMMARY

MEWARX LEGACY

MEWARX LEGACY is a community-driven blockchain ecosystem built on BNB Smart Chain, combining decentralized governance, transparent treasury management, and real-world business integration. Through its DAO framework, token holders participate in key decisions, ensuring transparency, security, and long-term sustainability.

The ecosystem includes AURUM, a utility token designed to support ecosystem services and practical applications across hospitality and community-focused businesses. With a fixed supply of 10,000,000 tokens, MEWARX LEGACY aims to create sustainable value through innovation, participation, and decentralized ownership.

Vision

To build a globally recognized, community-driven blockchain ecosystem that combines decentralized governance, real-world utility, and sustainable growth through transparency, innovation, and collective ownership.

Mission

MEWARX LEGACY aims to build a transparent and decentralized ecosystem where the community actively participates in governance and treasury decisions. By combining blockchain innovation with real-world business applications, the project seeks to enhance the utility of MEWARX LEGACY and AURUM tokens while promoting sustainable growth, security, and long-term value through community-driven development and decentralized ownership.

FOUNDATION OF MEWARX LEGACY

MEWARX LEGACY is built on the principles of transparency, decentralization, and community ownership, empowering members through DAO-driven governance and on-chain accountability.

Governance

Community-led decision-making through a decentralized DAO framework.

Treasury

On-chain treasury management ensuring transparency and accountability.

Utility

Bridging blockchain technology with real-world businesses and ecosystem services.

Growth & Innovation

Driving sustainable growth through security, innovation, and long-term community value.

MARKET OPPORTUNITY

The world is rapidly transitioning toward a digital and decentralized economy. Demand for transparency, security, and efficiency continues to grow, while traditional business models face challenges related to centralized control and limited participation.

MEWARX LEGACY Core Pillars:

- **Digital Assets & DeFi Adoption**
- **Decentralized Governance**
- **Transparency & Security**
- **Real – World Utility & Demand**

MEWARX LEGACY combines blockchain technology, DAO governance, and real-world hospitality ventures to create a transparent, inclusive, and sustainable ecosystem connecting digital innovation with hospitality businesses.

OPPORTUNITY

The world is rapidly transitioning toward a digital and decentralized economy. Across hospitality, tourism, payment services, and community-driven investments, the demand for transparency, security, and operational efficiency continues to grow. Traditional business models often face challenges related to centralized control, limited stakeholder participation, and lack of transparency.

MEWARX ECOSYSTEM

**DAO
GOVERNANCE**

**COMMUNITY
STAKEHOLDER**

**HOSPITALITY
VENTURES**

**TRANSPARENT
TRESURY**

MEWARX LEGACY seeks to capitalize on these opportunities by building an ecosystem where community members are not merely users but active stakeholders in the project's growth, governance, and long-term vision. Through DAO-driven governance, treasury-backed development, and a hospitality-focused expansion strategy, the ecosystem aims to bridge the gap between traditional industries and blockchain innovation.

MEWARX LEGACY

ECOSYSTEM

MEWARX LEGACY is a DAO-governed, treasury-driven, and utility-oriented blockchain ecosystem designed to integrate decentralized governance, strategic treasury management, and real-world utility into a sustainable and community-owned network.

MEWARX LEGACY TOKEN

The native governance token of the ecosystem. It enables voting rights, DAO participation, treasury involvement, and community representation.

DAO GOVERNANCE FRAMEWORK

The DAO is the highest decision-making authority. All major proposals, treasury allocations, and strategic initiatives are decided through transparent on-chain voting.

TREASURY INFRASTRUCTURE

Supports ecosystem expansion, strategic opportunities, and long-term development.

AURUM SERVICE TOKEN

Connects blockchain assets with real-world services and business utility.

HOSPITALITY ECOSYSTEM

Brings blockchain governance into hotels, tourism, and hospitality ventures.

COMMUNITY NETWORK

Empowers members to shape the ecosystem through voting and participation.

TOKENOMICS

MEWARX LEGACY operates with a fixed supply of 10,000,000 MEWARX LEGACY tokens on the BNB Smart Chain. The token is non-mintable, non-upgradable, and serves as the primary governance asset of the ecosystem.

85% **Treasury Fund**
8,500,000 MEWARX LEGACY

14% **Private Sale**
1,400,000 MEWARX LEGACY

1% **Liquidity Pool**
100,000 MEWARX LEGACY

Treasury Fund

The Treasury Fund constitutes the largest allocation and is governed through DAO voting. These funds support ecosystem development, venture expansion, strategic initiatives, and long-term sustainability.

Private Sale

The Private Sale allocation is reserved for early supporters and strategic participants. Vesting and lock-up mechanisms may be implemented to promote responsible distribution and market stability.

Liquidity Pool

The Liquidity Pool allocation supports decentralized market liquidity and efficient token trading. Liquidity may be secured through recognized liquidity-locking solutions to enhance transparency and community confidence.

DAO GOVERNANCE

FRAMEWORK

The MEWARX LEGACY DAO (Decentralized Autonomous Organization) is the highest governing authority within the ecosystem. It ensures that governance, treasury management, and strategic decision-making remain transparent, decentralized, and community-driven.

GOVERNANCE PRINCIPLES

Decentralized
Decision-Making

Community
Ownership

Transparency

Accountability

On-Chain
Governance

Equal
Participation

PROPOSAL ELIGIBILITY

To submit a governance proposal, a participant must hold MEWARX LEGACY tokens with a minimum market value equivalent to:

10000 USDT = MEWARX

at the time of proposal submission.

This requirement ensures that proposals are submitted by committed ecosystem participants who maintain a meaningful stake in the long-term success of the ecosystem.

TREASURY GOVERNANCE PROCESS

Security Rule:

No founder, council member, administrator, or individual participant may independently access or control treasury assets.

GOVERNANCE TRANSPARENCY

All governance activities are permanently recorded on-chain, including:

01

Proposal Creation

Every proposal is permanently recorded on-chain for complete transparency.

02

Voting Results

All voting outcomes are publicly verifiable on the blockchain.

03

Treasury Decisions

Every treasury allocation and decision is transparently tracked on-chain.

04

Governance Actions

All governance activities are immutably documented for accountability.

DAO Council

The DAO Council is a governance-support body that helps implement community-approved proposals, coordinate ecosystem activities, and support the growth of the MEWARX LEGACY ecosystem.

Council Structure

- Maximum of 7 Council Members.
- Membership is not permanent and is subject to DAO governance.
- The Council serves as an advisory, coordination, and execution body.
- The Council has no authority above the DAO.

Membership Term

- Each member serves a 1-year term.
- Members may seek reappointment or re-election after their term ends.
- Membership does not renew automatically.

Appointment of Members

- New Council Members may be appointed when a position is vacant or when the Council has fewer than 7 members.

Requirements:

- Minimum 20% quorum of the circulating voting supply.
- Minimum 51% approval of votes cast.

Approved candidates serve a 1-year term.

Removal of Members

- Council Members may be removed before the end of their term through a DAO proposal.
- Requirements:
 - Minimum 20% quorum of the circulating voting supply.
 - Minimum 51% approval of votes cast.
- If approved, the position becomes vacant and may be filled through the appointment process.

Responsibilities

The Council shall:

- Implement DAO-approved proposals.
- Support ecosystem development and strategic planning.
- Encourage community participation.
- Coordinate ecosystem operations.
- Maintain transparency and accountability.
- Act in the best interests of the community.

Limitations

The Council shall not:

- Override community-approved proposals.
- Access or spend Treasury Funds without DAO approval.
- Amend the Constitution outside the governance process.
- Exercise veto power over DAO decisions.
- Operate independently of DAO governance.

DAO Supremacy

The DAO is the highest governing authority of the MEWARX LEGACY ecosystem.

All Council Members, committees, representatives, and operational bodies remain subject to DAO governance and community decisions.

No Founder, Council Member, individual, or organization has authority above the DAO.

1 MEWARX LEGACY = 1 Vote

Ultimate authority remains with the community through transparent, verifiable, and decentralized on-chain governance.

TREASURY MANAGEMENT

The Treasury Fund is the financial foundation of the MEWARX LEGACY ecosystem. It is designed to support long-term growth, ecosystem expansion, strategic initiatives, and sustainable development under the full authority of the DAO.

TREASURY PRINCIPLES

Community Ownership

Treasury assets belong to the ecosystem and are governed collectively by token holders through the DAO.

Transparency

All Treasury proposals, voting results, approvals, and transactions are publicly verifiable on the blockchain.

Accountability

Every Treasury expenditure must be supported by an approved proposal and remains subject to community oversight.

Decentralization

No centralized entity or individual can control Treasury resources.

TREASURY UTILIZATION

Subject to DAO approval, Treasury resources may be allocated toward:

Ecosystem Development

Infrastructure Expansion

Technology Development

Strategic Investments

Hospitality Ventures

Community Growth Programs

Security Enhancements

Long-Term Sustainability Initiatives

SMART CONTRACT ENFORCEMENT

- ▶ Treasury operations are governed by a non-upgradable DAO smart contract.
- ▶ Upon successful approval of a proposal, Treasury actions are executed according to predefined governance rules.
- ▶ No manual intervention can override approved governance decisions.

SECURITY FRAMEWORK

01

The Treasury operates under DAO Governance Controls, On-Chain Verification, and Community Oversight, ensuring security, transparency, and accountability.

TRANSPARENCY & AUDITABILITY

02

Every Treasury proposal, vote, approval, and transaction is permanently recorded on the blockchain, ensuring transparency, accountability, and long-term trust.

TREASURY FUND SOURCES

03

Treasury resources are generated through Ecosystem Revenue, Transaction Fees, Strategic Investment Returns, Partnerships & Collaborations, and other DAO-approved sources.

TREASURY FUND PROTECTION

04

The Treasury is protected through multi-layer governance approvals, smart contract execution, on-chain verification, and a zero-tolerance policy for misuse.

TECHNICAL ARCHITECTURE & SECURITY

The MEWARX LEGACY ecosystem is built on a secure, transparent, and decentralized blockchain infrastructure designed to support governance, treasury management, and long-term ecosystem sustainability.

Its architecture ensures immutability, transparency, security, and community ownership.

Blockchain	Binance Smart Chain (BSC)
Token Standard	BEP-20
Decimals	18
Total Supply	10,000,000 MEWARX LEGACY
Supply Model	Fixed Supply
Minting Function	Permanently Disabled

- **SMART CONTRACT ARCHITECTURE** ▼

The ecosystem operates through the Token Contract for token management and the DAO Governance Contract for voting, governance, and treasury operations.

- **NON-UPGRADABLE INFRASTRUCTURE** ▼

Core smart contracts are permanently deployed and cannot be modified, ensuring immutability, trust, and transparency.

- **TREASURY SECURITY** ▼

Treasury assets are protected through DAO governance, requiring community approval and smart contract execution for all actions.

- **GOVERNANCE SECURITY** ▼

Governance is secured through on-chain voting, quorum requirements, public verification, and community oversight.

- **TRANSPARENCY FRAMEWORK** ▼

All governance, voting, treasury, and smart contract activities are permanently recorded on-chain for public verification.

- **ECOSYSTEM RELIABILITY** ▼

Decentralized governance, fixed supply economics, transparent treasury management, and community participation ensure ecosystem stability.

HOSPITALITY ECOSYSTEM

The MEWARX LEGACY ecosystem integrates blockchain technology with the global hospitality and entertainment industry to create real-world utility, economic opportunities, and long-term value for the community.

- DAO-governed initiatives enable transparent and community-driven business expansion.
- Treasury-backed development supports sustainable growth across multiple hospitality sectors.
- Bridging decentralized governance with real-world business operations.

HOSPITALITY

VALUE TO THE ECOSYSTEM

Real-world utility and adoption

Revenue-generating opportunities

Community employment & growth

Stronger partnerships & alliances

Long-term sustainable value

MEWARX LEGACY

KEY OBJECTIVES

DAO-GOVERNED BUSINESS

All hospitality initiatives are proposed, discussed, voted on, and implemented through a transparent DAO governance process, ensuring community participation, accountability, and continuous oversight.

TREASURY-SUPPORTED

The DAO Treasury supports infrastructure, marketing, partnerships, operations, and innovation initiatives that drive long-term growth and real-world ecosystem value.

AURUM UTILITY

AURUM powers payments, memberships, rewards, exclusive experiences, and ecosystem services, serving as the utility layer across the hospitality ecosystem.

EXCHANGE & LIQUIDITY STRATEGY

A strong exchange presence and sustainable liquidity infrastructure are essential for the growth, accessibility, and market efficiency of the MEWARX LEGACY ecosystem. Our Exchange & Liquidity Strategy is designed to support ecosystem adoption, trading efficiency, and long-term sustainability while maintaining transparency and community confidence.

STRATEGIC OBJECTIVES

- **Expand Global Market Access**
- **Increase Ecosystem Visibility**
- **Strengthen Community Participation**
- **Support Long-Term Growth**

Exchange Integration

DEX INTEGRATION	CEX EXPANSION
Open Market Access	Increased Market Exposure
Decentralized Trading	Enhanced Liquidity
Transparent Liquidity	Improved Brand Recognition
Global Accessibility	Global User Acquisition

LIQUIDITY INFRASTRUCTURE

A sustainable liquidity model ensures:

TRADING
EFFICIENCY

PRICE
DISCOVERY

MARKET
STABILITY

INVESTOR
CONFIDENCE

MARKET SUSTAINABILITY

- ▶ Responsible Growth
- ▶ Market Stability
- ▶ Community Participation
- ▶ Long-Term Value Creation

TREASURY-SUPPORTED INITIATIVES

DAO-approved treasury resources may support:

- ▶ Liquidity Pool Development
- ▶ Market Making Support
- ▶ Strategic Partnerships
- ▶ Exchange Listings

LONG-TERM VISION

To build a globally accessible, community-driven, and sustainable market infrastructure that supports adoption and long-term growth.

ROADMAP & MILESTONES

PHASE 1 – FOUNDATION, LAUNCH, GOVERNANCE & ECOSYSTEM (2026)

Building and expanding the MEWARX ecosystem on BNB Smart Chain through decentralized governance, real-world utility, partnerships, and sustainable growth.

Key Deliverables

- Whitepaper Finalization
- Smart Contract Development, Audit & Deployment
- DAO Governance Constitution Deployment
- Token Generation Event (TGE)
- Private Sale & Liquidity Creation
- Exchange Listing Preparation
- MEWARX Platform Launch
- Community Launch & Global Expansion
- Full DAO Proposal & Voting System Activation
- Treasury Fund Controlled via On-Chain Voting
- Transparency Dashboard Launch
- Strategic Partnerships & Ecosystem Growth
- Multi-Exchange Presence
- Real-World Utility Integration
- Hospitality & Merchant Ecosystem Expansion
- Governance Upgrades & DAO Scaling
- Venture Development & Revenue-Sharing Framework
- Treasury Growth & Asset Acquisition Strategy

Fully Transparent On-Chain Treasury

Final Milestone

MEWARX Ecosystem Fully Operational with Active DAO Governance, Real-World Utility, Multi-Exchange Presence, and Sustainable Treasury Economy.

Status

Progress: **90%** Completed

PHASE 2 – ECOSYSTEM DEVELOPMENT & GLOBAL EXPANSION (2027)

Expanding the MEWARX ecosystem through DAO-driven innovation, global community growth, advanced governance, and sustainable treasury development.

Key Deliverables

- MEWARX ecosystem dApps launch
- Ecosystem fund utilization via DAO proposals
- Audit reports & transparency disclosures published
- Governance participation incentives introduced
- Cross-chain compatibility research & pilots
- Global DAO community expansion
- Advanced governance modules
- Sustainable treasury growth strategies
- Self-sustaining DAO framework
- Continuous upgrades through community governance

Status

Progress: **10%** Completed

FOUNDING MEMBERS

The Founding Members of MEWARX LEGACY are the visionaries who laid the foundation of our decentralized hospitality ecosystem.

S.No.	Name	DESIGNATION
1	Mr. Mahendra Singh Chundawat	FOUNDER
2	Mr. Subhash Kumar Saini	FOUNDER
3	Mr. Desh Raj	FOUNDER
4	Mr. Mukesh Kumar Garg	FOUNDER
5	Mr. Anil Kumar	FOUNDER
6	Mr. Vinod Patidar	FOUNDER
7	Mr. Firoj Khan	FOUNDER
8	Mr. Kailash Audichya	FOUNDER
9	Mr. Imran Khan	FOUNDER
10	Mr. Kamal Singh	FOUNDER
11	Mr. Pankaj Kumar Choudhary	FOUNDER
12	Mr. Ravi Pandey	FOUNDER
13	Mr. Gautam Kumar	FOUNDER
14	Mr. Memvir Singh	FOUNDER
15	Mr. Rajveer Singh	FOUNDER
16	Mr. Nirbhay Singh Rathore	FOUNDER

Conclusion

MEWARX LEGACY is a decentralized, community-governed ecosystem built on transparency, security, and long-term sustainability. Powered by DAO governance, it enables token holders to participate in proposals, voting, treasury oversight, and key strategic decisions.

By integrating the MEWARX LEGACY governance token with the Aurum service token, the ecosystem creates a balanced model that supports governance, utility, and real-world adoption. Built on the BNB Smart Chain, it leverages secure and transparent smart contracts to ensure trust and operational integrity.

MEWARX LEGACY combines decentralized governance with real-world business opportunities, fostering sustainable growth, community participation, and long-term value creation.

Official Resources

A strong exchange presence and sustainable liquidity infrastructure are essential for the growth, accessibility, and market efficiency of the MEWARX LEGACY ecosystem. Our Exchange & Liquidity Strategy is designed to support ecosystem adoption, trading efficiency, and long-term sustainability while maintaining transparency and community confidence.
